# Career Day

## Inside and outside academia

Insights into the possibilities after your PhD

Are you currently in your third year of Ph.D. or intend to complete your thesis? Did you complete your first postdoc and think about the next step of your career?

If yes, this event is exactly what you might need at your current position.

Here we offer you the opportunity to get an overview of the next possible career steps inside and outside academia and also in different research-related professional areas. For this purpose, we have invited several speakers from very different fields to talk about their career paths and to discuss their experiences and how they got there.

We look forward to welcoming you to our online event and the exchange of ideas and experiences between all participants.

## Program

Day 1		Thursday, July 1, 10:50 am - 17:15 pm
